

Environmental Fee

While working to meet the equipment needs of our valued customers, Anderson Rentals handles many potentially hazardous materials like fuel, oil, cleaners, and batteries every day. We strive to make sure those materials do not harm the environment, this is an important part of our continued efforts to be responsible members of the communities where we work and live. We are committed to protecting the environment and our communities, responsible management of these materials and their waste by-products is expensive.

Anderson Rental's environmental fee is designed to offset a wide range of environmental expenses (direct and indirect). Expenses may include waste disposal, construction/maintenance of cleaning facilities, acquisition of more fuel-efficient equipment, labor costs, administrative costs, etc. In an effort to minimize impacts to the environment, Anderson Rental has put in place practices that include containing our potentially hazardous materials, and proper disposal of oil, filters, tires, batteries, and shop waste.
